PROJECT HIGHLIGHT

PRIMUS - COLD STORAGE LOCATED IN WILMINGTON, NC

Our civil division is actively engaged in the Cold Summit project for Primus, where we are dedicated to the construction of a cutting-edge Cold Storage facility. Our scope of work encompasses a range of critical activities, including the meticulous clearing and grubbing of a woodland area, executing a substantial 23-acre earthwork operation involving the transportation of 84,000 cubic yards of structural fill, precision installation of base course stone for TCP (thin concrete paving), the creation of three retention ponds, and the establishment of a robust storm drain system. Furthermore, our responsibilities extend to the installation of essential utilities, including sewer, water, and a fire suppression system. This collective effort will culminate in the realization of a remarkable 285,640 square foot cold storage warehouse, complemented by four additional offices for an all-encompassing, state-of-the-art facility.

EMPLOYEE OF THE MONTH

Congratulations to

JUSTIN WILKES

Justin has been named our Employee of the Month for his outstanding dedication and exceptional work as a mechanic. Justin's commitment to excellence and unwavering reliability have not gone unnoticed, and this recognition is well-deserved.

Be sure to Congratulate Justin!

GOLD AWARD WINNER!

Civil Works has been honored with the esteemed Gold Award, designating us as one of the recipients of the

Safe Contractor of the Year Award

by the National Railroad Construction & Maintenance Association. This recognition applauds our remarkable commitment to fostering and elevating safety standards within the rail contracting sector.
