

OCTOBER 2024

NEWSLETTER

SEVERE STORM PREPAREDNESS

All workers should prioritize storm safety during hurricane season by staying informed through reliable weather updates. Regularly check forecasts and sign up for alerts. Before severe weather hits, secure the jobsite by properly storing tools, equipment, and materials. Ensure scaffolding, temporary structures, and loose items are securely fastened. Familiarize yourself with CWC's Safety Storm Plan and follow all safety protocols to protect both workers and the jobsite from potential hazards.

HAMPSTEAD K-8 SCHOOL

The new Pender County K-8 school is our second collaboration with Bordeaux Construction Company, involving a comprehensive 42.1 acre turn-key project with a three year timeline. The scope of work includes multiple phases: mass earthmoving of 225,000 cubic yards of import material, construction of a 22 foot high surcharge with subsequent disbursement and placement, installation of underground utilities and storm drains, as well as curb, sidewalk, and paving work.

EMPLOYEE OF THE MONTH Trevor Price

Trevor's hands-on leadership and expertise in grading, utility installation, and storm drain work make him an invaluable asset to the team.

Shaping Tomorrow

The construction of the new C.E.H. headquarters is progressing well. With the completion of the mechanic bays and offices, our attention has shifted to finalizing the outdoor elements, including paving, concrete surfaces, drainage, and landscaping. We are on track to host the annual Christmas party in this new space and anticipate it will serve as a foundation for continued success in 2025.
