"CIVIL WORKS IS LEADING THE WAY BY INTEGRATING DIGITAL CONSTRUCTION TECHNOLOGIES AND USING DATA-DRIVEN PRACTICES TO IMPROVE THE OVERALL CONSTRUCTION PROCESS."

## DATUBIM CASE STUDY

This past month, Civil Works was chosen to be a part of a case study headed by "Datumate - Construction Data Analytics." Datumate develops innovative solutions for the construction industry. They offer software and services that utilize big data analytics, AI & machine learning, state-of-the-art computer vision, and drone and camera technologies. The case study is focused on our local Argento project where dirt volumes, stock piles, excavating ponds, and piles of debris were measured by using this software.

### FORT FISHER - VISITOR CENTER PROJECT HIGHLIGHT

Civil Works Contracting has been awarded the sitework contract for the Visitor Center and Underwater Archaeology Building at the Fort Fisher State Historic Site by Bordeaux Construction Company. This comprehensive Civil project consists of Erosion Control, Clearing, Grading, Pavement, Sidewalks, Utilities, Fencing, and more. We will also be cleaning and reinstalling the historic Cannon and Anchor on site. CWC is currently clearing and grading the site to prepare for paving.

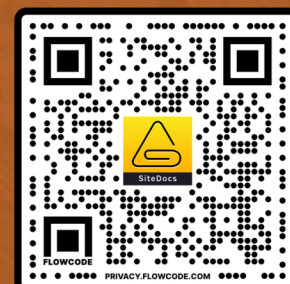

WE WOULD LIKE TO CONGRATULATE  
**VANDER GROOMS**

FOR WINNING THIS MONTH'S SAFETY STAR!  
VANDER HAS GONE ABOVE AND BEYOND IN  
IMPLEMENTING SITE DOCS DAILY AND  
STAYING ON TRACK WITH EQUIPMENT  
INSPECTIONS AND TOOLBOX TALKS.

### HOW DO I BECOME THE SAFETY STAR WINNER?
